

ANALYSIS OF TARGETS ESTABLISHED BY PARTIES AND PROGRESS TOWARDS THE AICHI BIODIVERSITY TARGETS

I. Background

1. In adopting the Strategic Plan for Biodiversity 2011-2020, the Conference of the Parties to the Convention on Biological Diversity invited Parties to establish their own national targets, using the Strategic Plan as flexible framework, taking into account national needs and priorities, while also bearing in mind national contributions to the achievement of the global Aichi Biodiversity Targets. Further Parties were urged to review, and as appropriate update and revise, their national biodiversity strategies and action plans (NBSAPs), in line with the Strategic Plan and the guidance adopted in decision IX/9, including by integrating their national targets into their national biodiversity strategies and action plans, adopted as a policy instrument.
2. The Conference of the Parties (decision X/2) also noted the need to keep the implementation of the Strategic Plan for Biodiversity under review. The national reports are a main source of information for doing this. In decision X/10, the Conference of the Parties requested Parties to submit their fifth national report by 31 March 2014. Later, the Subsidiary Body on Implementation, in recommendation 1/1, emphasized that the effective review of progress towards the implementation of the Strategic Plan for Biodiversity 2011-2020 depends on the timely submission of information from Parties, and recalling decisions XI/3 and XII/2 A, urged those Parties that have not yet submitted their fifth national report to do so as a matter of urgency, and no later than 30 June 2016.
3. In decision X/2 the Conference of the Parties requested the Executive Secretary to prepare an analysis/synthesis of national, regional and other actions, including targets as appropriate, established in accordance with the Strategic Plan, to enable the Working Group on Review of Implementation of the Convention at its fourth meeting and the Conference of Parties at its eleventh and subsequent meetings to assess the contribution of such national and regional targets towards the global targets. This analysis/synthesis was presented in document UNEP/CBD/SBI/1/2/Add.2. Subsequently in its recommendation 1/1, the Subsidiary Body on Implementation took note of the analysis and requested that it be updated on the basis of information contained in additional national biodiversity strategies and action plans and fifth national reports, and taking into account comments by Parties, and to make the updated analysis available for consideration by the Conference of the Parties at its thirteenth meeting. In response to this request, the Secretariat, in document UNEP/CBD/COP/13/8/Add.2/rev1, updated the analysis of the contribution of targets established by Parties and progress towards the Aichi Biodiversity Targets made available to Subsidiary Body on Implementation at its first meeting with information from additional national biodiversity strategies and action plans received by 24 November 2016. The Subsidiary Body on Implementation, at its second meeting, will again consider this issue and as such has prepared document CBD/SBI/2/2/Add.2 which provides an updated analysis/synthesis of targets established by Parties and progress towards the Aichi Biodiversity Targets based on the fifth national reports and revised or updated NBSAPs received by 14 March 2018.
4. This note presents, in the annex, the information underpinning the analysis/synthesis presented in document CBD/SBI/2/2/Add.2. For each Party national progress towards the Aichi Biodiversity Targets, based on information presented in the fifth national reports is indicated as well as the extent to which the national targets or similar commitments contained in the revised or updated national biodiversity strategies and action plans correspond to the global aspirations set out in the Aichi Biodiversity Targets. It is important to note that the assessment of the national targets in the NBSAPs was conducted considering the scope and level of ambition of the national target against that of the Aichi Target. It did not consider the national circumstances of a country. Therefore some targets, which when compared to the Aichi Target, are lower than the Aichi Target may nonetheless be ambitious in light of a country's starting point. Similar it is important to note that the information derived from the national reports in this assessment reflects the anticipated level of progress at the end of the Aichi Target date based on the status and actions taken to date. As such the categories indicate the current trajectory of progress and assume that this remains unchanged between the time of the assessment and the target date. Further this assessment does not consider national circumstances or baselines. For these reasons, the information presented in this document cannot be used to compare progress among countries. It is only suitable to generating a global picture of progress towards the Aichi Biodiversity Targets.

Annex

Analysis of targets established by Parties and progress towards the Aichi Biodiversity Targets as of 14 March 2018
